Persan, 2019

Marmara, a brand new collection from Dokumacı, is a contemporary and eclectic blend of design influences. A stylish and sophisticated collection in a super trendy colour palette.

The main fabric, giving the collection its name, is a beautifully stone washed cotton jacquard fabric. Featuring relaxed leaf patterns and enhanced by a little bit of chenille, Marmara has a fabulous natural touch. A reinterpreted classical damask design with a worn out effect and unique finishing technique is also another strong element of the collection, accompanied by richly textured tweeds and wonderfully matching plains.

A kilim inspired chunky chenille weave also stands out with its soft touch and rich texture creating a sense of depth.

A wide selection of beautiful drapery fabrics is in perfect harmony with the upholstery fabrics. A variety of prints featuring elegant cranes, sparrow flocks, tropical leaves, marble effects, accompanied by voluminous plains and sheers. All carefully composed in a wonderful colour palette of cool petrol blue, forest green, vibrant yellow and warm pink along with hues of earthly tones.
