

Black & White

Black & White

Black and White, without no doubt the most striking style of all times ; beautiful, elegant, opulent and timeless...

The combination of these two colours never lost its charm throughout the years. One is the colour of mystery, the other is of innocence... They attract each other and come together in impeccable harmony creating an effortlessly graceful style...

Black&White, new collection of Persan for 2018, drawing its inspiration from these opposite colours, is an avant-garde collection that brings forward bold designs with strong and striking textures. While bringing together different types of qualities, the collection consists of a remarkably wide selection of fabrics in terms of composition, texture and type of usage.

The collection features ethnic and ikat inspired designs reinterpreted with a contemporary taste, interlocking linear designs, medallion designs, geometrics, stripes, checks and herringbone designs. Coordinating with these patterns, Black&White also offers a wide variety of plains and textures such as velvets, chenilles, satins, jacquard sheers and draperies with pleat effect. While presenting strong and contrasting combinations in black and white, the collection is also supported with greys and minks in various fabrics.

A timeless and versatile collection, Black&White reflects the spirit of its time, featuring elegant fabrics created for both modern and contemporary spaces as well as luxurious and classical interiors.
